ARMS AND SECURITY

XVII INTERNATIONAL EXHIBITION

June 15-18, 2021
Ukraine, Kyiv

International Exhibition Centre

**Greetings to the participants and visitors of the
«Arms and Security» XVII International Specialized Exhibition
and the «Aviasvit XXI» XII International Aviation and Space Salon.**

I sincerely congratulate you on the occasion of the opening of the «Arms and Security» XVII International Specialized Exhibition and the «Aviasvit XXI» XII International Aviation and Space Salon.

The «Arms and Security» and the «Aviasvit XXI» exhibitions have become well-established platforms for showcasing the development and growth of the national defense industry and aerospace complex, the implementation of scientific and engineering ideas, new military equipment, innovative developments in the defense sector. Aircraft and rocket engineering has been a matter of national pride for many generations of Ukrainians and a priority high-tech industry whose development has a positive impact on the buildup of this country's economy.

I am confident that the exhibitions and business program would attract considerable interest among experts, open up new opportunities for sharing best practices, conducting negotiations and signing contracts, and will advance international military technical cooperation and promotion of domestic high-tech products in foreign markets.

I wish the participants and guests success, productive work and superior achievements!

**Deputy Prime Minister of Ukraine —
Minister for Strategic Industries of Ukraine**

A handwritten signature in black ink, appearing to read 'Oleh Uruskyi', with a long, sweeping line extending upwards and to the right.

Oleh URUSKYI

Dear participants, guests and organizers of the exhibition!

On behalf of the administration of the Ministry of Internal Affairs of Ukraine, I sincerely congratulate you on the occasion of the opening of the «Arms and Security 2021» XVII International Specialized Exhibition of Protective Means, Arms, Military and Special Equipment! The common goal of developing the security and defense sector should consolidate efforts by government authorities, enterprises of the defense industry, non-governmental organizations and associations in addressing the problems of technical and technological fit-out of law enforcement authorities and military formations, state border security, and

emergency mitigation.

This year a number of events dedicated to the full range of security issues will be held on the International Exhibition Center's show floors as part of the «Arms and Security 2021», «Aviasvit XXI», «Expert Security», «Protection Technologies/FireTech» international exhibitions, offering exceptionally good opportunities to learn about cutting-edge scientific design achievements in the field of military and special equipment, protection and preservation of human life, health and well-being.

A rich and diverse program has always been a hallmark of the «Arms and Security» International Forum, so today the exhibition stands will feature the widest display, innovative solutions will be presented, negotiations and friendly meetings will be held to launch a direct constructive dialogue, establish partnerships and forge business ties between participants. During the exhibition, its guests and participants will be able to attend exciting and useful workshops, look through scientific reports and listen to educational lectures.

I wish you inspiration in your activities, fruitful business contacts, and successful cooperation towards attaining the common goal of strengthening the rule of law, order and sustainable development of the State.

Minister of Internal Affairs of Ukraine

A handwritten signature in blue ink, which appears to read 'Arsen Avakov'. The signature is fluid and stylized, with a long horizontal stroke extending to the right.

Arsen AVAKOV

Dear Ladies and Gentlemen!

I would like to welcome participants and guests of the Arms and Security-2021 XVII International Specialized Exhibition and Aviasvit-XXI International Aviation and Space Salon.

For many years now, faced with the armed aggression of Russia, Ukraine has been trying, alone and with the active support of its partner countries, to meet the needs of the Ukrainian Armed Forces to uphold its sovereignty and the integrity of the country.

During these years, we have renovated and upgraded existing arms and military equipment developed and supplied to the Ukrainian army new military equipment in line with today's security challenges and in the light of battle action experience.

The reforms in Ukraine's defence industry have increased the demand for products and services from Ukrainian businesses on global arms markets.

2021 Arms and Security 2021 and Aviasvit-XXI have become the basic security platform in defence, aviation and space technologies for all those concerned with strengthening the defence potential of Ukraine. This is the most effective and important platform for establishing a partnership and continuing Ukraine's best future projects, which are being developed under today's threats and challenges to regional security. This is also a great opportunity for a direct dialogue between the industrial sector and military experts to build up joint approaches to the making of promising arms and military equipment.

I am confident that the exhibitions will result in the further refurbishment of weapons, military and specialised equipment of the Ukrainian Armed Forces, in line with the latest trends of the global arms market, and will improve our partnership with manufacturers and suppliers of defence products.

I would like to wish every success to all participants and attendees of the exhibition, as well as efficient business projects and new accomplishments in promoting peace, well-being and prosperity.

**Deputy
Minister of Defence of Ukraine**

Oleksandr MYRONIUK

Dear colleagues!

This year the exhibition is truly special. Ukraine celebrates the 30th anniversary of independence and for the defence industry sector of the state it is a unique opportunity to demonstrate our achievements and accomplishments.

We acknowledge that power and strength of our defence are the pillars of our independence. We know it well. We know it after completing a long journey to become an equal player at the international arena. We know it, as our country has been defending its territorial integrity at Donbass for seven years. I am confident that jointly we will definitely return the state flags of Ukraine to the

administrative buildings in Sevastopol and Simferopol, to Donetsk and Luhansk. Year 2021 is rich in events and activities that take place under the auspices of the President of Ukraine Volodymyr Zelensky. On the 24th of August, the date of birth of the modern Ukrainian state, a large military parade is planned. With our friends and partners, with representatives of other states, we will talk about defence and security, about war and peace, about Crimea and Donbass.

We are implementing a comprehensive reform of Ukroboronprom and the defence industry sector of the state as a whole. Furthermore, this year, as part of the official Ukrainian delegations, Ukroboronprom took part in a number of international exhibitions — the IDEX-2021 arms exhibition in Abu Dhabi and the Aero India-2021 aviation exhibition in Bangalore. Both events reconfirmed the interest of our foreign partners in military and technical cooperation with Ukraine. I am confident that the XVII International Specialized Exhibition «Weapons and Security 2021» and the XII International Aerospace Show «AVIASVIT - XXI» will also be important venues for the development of Ukraine's defence industry and reinforce the interstate relations in the field of military and technical cooperation.

I sincerely congratulate everyone on the opening of the two Ukrainian exhibition forums in the field of security and defence! These events take place during the global COVID-19 pandemic, reconfirming the ability and desire of our country to improve our position among the high-tech countries! On the year of anniversary of Ukraine, it is of special significance.

The thirtieth anniversary of independence is an event of historical magnitude. We unite to value the support and efforts of all the countries that help us become stronger, defending the independence and territorial integrity of Ukraine.

Together we make Ukraine strong!

Sincerely,

General Director of Ukroboronprom

Yuriy Husyev

**Is held according to decree
of the Cabinet of Ministers of Ukraine**

Working hours:

Tuesday	June 15	10.00 — 18.00
Wednesday	June 16	10.00 — 18.00
Thursday	June 17	10.00 — 18.00
Friday	June 18	10.00 — 16.00

Entrance till 17.30 (Friday till 15.30)

EVENTS PROGRAM

Time	Location and Name of the Event
constantly	Booth of the Institute of Public Administration and Research in Civil Protection First aid master classes Organizer: <i>The Institute of Public Administration and Research in Civil Protection</i>

A T H L O N • A V I A

Since 2014 SPC «Athlon Avia» has been developing and manufacturing UASs for the needs of the security forces of Ukraine, in particular AI-CM «Furia» — the UAS of the aerial reconnaissance and artillery fire adjustment. During this time, more than 100 systems of various modifications have been produced for the needs of the Armed Forces of Ukraine, the National Guard of Ukraine, and the Security Service of Ukraine. In 2019 2020, the UAS passed a full cycle of state tests and was adopted by the Armed Forces of Ukraine.

Our company has been also developing the loitering munition UAS ST-35 «Silent Thunder», which is high-precision means of target defeat. The main features of this system are the possibility to destroy the target in closed positions and the use of different warhead types. The loitering munition using provides maximum effectivity of the mission execution with minimum collateral damage, in comparison with the traditional artillery means.

ATN

BEEP TARGET

172 Horodotska St., UA-79022 Lviv, Ukraine

tel./fax: +38 032 245 15 15

e-mail: beeptarget@gmail.com

www.beeptarget.com

Ukrainian manufacturer of interactive smart targets. BEEP TARGET is a universal training system that is suitable for training with firearms, paintball and airsoft weapons. You no longer need to measure your skills and shooting speed manually.

BEEP TARGET online calculates the reaction time, the number of hits and the total time of the exercise, the results will be displayed on your phone. In our free application you can choose different game modes, depending on your preferences.

BEEP TARGET — is a wireless radio communication system between targets and Bluetooth technology of pairing to the phone. Thanks to the amplified signal, the target can be placed at a distance of up to 800 m from the main control block, and the control block up to 10 m from the phone.

Continuous operation time on one battery charge — up to 12 hours.

We managed to create an easy-to-use and at the same time innovative system of smart targets designed to develop all shooting and tactical skills: reaction, accuracy.

tel.: +420 585 083 111
e-mail: marketing@excaliburarmy.eu
www.excaliburarmy.cz

EXCALIBUR ARMY designs, develops and produces a wide range of military vehicles and equipment. We strive to offer only high quality products and provide a variety of services for our customers all around the world. Our production and repair facilities have decades long tradition that reaches back to 1950s. All these years we have never ceased to understand the importance of military industry for national and international security and we are still standing proud by the code of freedom in defence of which so many lives were lost.

The company began its journey in 1995 as a trader with surplus military equipment. We started to repair, renovate and modernize main battle tanks, infantry fighting vehicles and artillery systems — rocket launchers and howitzers — and a great amount of spare parts and engines. We struck strategic alliances with foreign leaders in land systems defence sector and introduced advanced weapon and protected mobility systems.

In 2013 EXCALIBUR ARMY acquired Sternberk production and repair works and became the biggest military hardware supplier in the country.

Today company focuses on development and production of new products integrating proven concepts and modern state-of-the-art technology that meet the changing requirements of armed and security forces worldwide.

www.dndi.mvs.gov.ua

The State Research Institute MIA Ukraine is the leading research establishment of the Ministry of Internal Affairs. The Institute was founded according to the Decree of the Cabinet of Ministers dated September 8, 2005. During this time a number of research and design works were carried out; modern species of arms, means of self-defense, special transport, special technical means and criminalist technique were put into practice of law-enforcement activities; a significant contribution to the legal insurance of the counteraction to crime and creation of modern police of the European model was done.

The main tasks of the institute are:

- 1) the conduction of applied researches and scientific-technical (experimental) developments, aimed at scientific, scientific-technical and scientific-methodological support of the activities of the bodies of the Ministry of Internal Affairs of Ukraine, the National Guard of Ukraine and the central governments, coordinated by the Cabinet of Ministers of Ukraine;
- 2) the conduction of research in the field of ensuring the protection of human rights and freedoms, the interests of society and the state, combating crime, maintenance of public safety and order, as well as the provision of police services; protection of the state border and protection of the sovereign rights of Ukraine in its exclusive (maritime) economic zone; civil protection, protection of the population and territories from emergencies and prevention of their occurrence, liquidation of emergencies, rescue, fire extinguishing, fire and man-caused safety, activities of emergency rescue services, as well as hydrometeorological activities; migration (immigration and emigration), including combating illegal (illegal) migration, citizenship, registration of individuals, refugees and other categories of migrants defined by law;

- 3) an implementation of scientific, scientific-technical and innovation policy on the functioning of the Ministry of Internal Affairs (according to the established areas of activity);
- 4) an identification of modern world tendencies of scientific and technological progress, which are significant for the Ministry of Internal Affairs, the National Guard of Ukraine and the central governments coordinated by the Cabinet of Ministers of Ukraine;
- 5) the creation and introduction of a new special-purpose equipment for the Ministry of Internal Affairs, the National Guard of Ukraine and the central governments coordinated by the Cabinet of Ministers of Ukraine;
- 6) the introduction of the results of researches and scientific-technical developments for the purposes of the Ministry of Internal Affairs, the National Guard of Ukraine and the central governments coordinated by the Cabinet of Ministers of Ukraine;
- 7) the conduction of works on the assessment of conformity of products to technical regulations and voluntary certification in accordance with the sphere of accreditation of the conformity assessment body and outside the sphere of accreditation in accordance with the available material and technical basis;
- 8) the conduction of testing to assess the conformity of products in accordance with the sphere of accreditation and outside the sphere of accreditation in accordance with the capabilities of existing equipment;
- 9) educational activities at the educational-scientific and scientific levels of higher education, subject to obtaining a license for educational activities in the order and under the conditions specified by law.

State Research Institute is the flagship of the best traditions of scientific and technical activity in the Ministry of Internal Affairs. The Institute's activities are aimed at creating and developing a modern law enforcement system.

**ESD – for the step
beyond thought
leadership**

EUROPEAN SECURITY & DEFENCE is a specialist magazine tracking events and developments in the defence and security arena. One of the magazine's objectives is to describe, explain and interpret European and transatlantic security policy – which extends far beyond conventional defence with military forces – in all its complex and sophisticated correlations.

EUROPEAN SECURITY & DEFENCE provides answers to questions on international affairs, business, technology and defence/security matters. Our analysis is based on neutral and in-depth investigation.

The primary mission of **EUROPEAN SECURITY & DEFENCE**, both in print and online, and including the daughter publication **ESD SPOTLIGHT**, is to convey information and influence within the European theatre, to and from decision makers at all levels in the security and defence arenas.

БЕЗ НАТО В УКРАЇНИ НЕМАЄ МАЙБУТНЬОГО

Найвідоміший у світі український
художник Іван Марчук — про
творчість та вступ України до Альянсу

СОЛДАТ ДЖЕЙН

У Збройних Силах України
наразі служить майже
такий самий відсоток
жінок, як в арміях
держав-членів НАТО

Україна до НАТО

№1 (3) [січень-лютий 2020 року]

Рік стандартів НАТО

Армію чекає докорінна
трансформація та реальне
приведення до стандартів Альянсу
